SUMMARY

Detail-oriented and results-driven student with proficiency in Python (Pandas, NumPy), SQL, and data visualization tools (Power BI). Seeking a Data Analytics Intern role at company to help extract actionable insights and contribute to optimizing business strategies. Committed to leveraging strong problem-solving skills and academic background in data modeling and statistical analysis, to support real-world projects and learn from industry experts.

EXPERIENCE

Full Stack Developer Intern

August 2025 - July 2026, Kolhapur, Maharashtra, India

Microtech Solutions

- Developed and implemented full-stack applications using React (frontend) and Python (backend), focusing on real-time data handling and user-friendly interfaces.
- Built practical projects like an AI-based website builder and dashboard management systems, improving automation and reducing manual effort.
- Skilled in integrating APIs, managing databases, and creating responsive UI designs to deliver efficient and scalable solutions.

Web Development Intern

July 2023 - August 2023, Gargoti, Maharashtra, India

Dnyanda Solutions

- Completed a 1-month internship during diploma studies, where I worked on web development projects using PHP, JavaScript, HTML, and CSS, contributing to building responsive web pages and gaining hands-on experience in real-world application development.

EDUCATION

B.Tech in Data-Science

·DY Patil Agriculture and Technical University Talsande

·Kolhapur, Maharashtra, India ·2026 CGPA - 7.96

Diploma in Computer-Science Engineering

·Institute of Civil and Rural Engineering, Gargoti

·Kolhapur, Maharashtra, India ·2023 ·75%

SKILLS

- Python, React, HTML, Javascript PHP, CSS, R Programming.
- Machine Learning, Apache Nifi, Power BI
- MySQL, MSSQL

PROJECTS

1) AI Website Builder

FastAPI, React.js, Tailwind CSS, Sarvam AI / Hugging Face API | 7 days

- Developed an AI-powered website builder using FastAPI (Python) and React to generate multi-page responsive websites from user prompts
- Integrated AI APIs for dynamic content generation and automated layout creation with modular UI components
- Implemented features like navigation, gallery, contact forms, and real-time website preview for enhanced user experience

2) Sales Management Dashboard

React, Node.js, SQL Server | 1-2 Months

- Built a dynamic, database-driven sidebar navigation system using React (Material-UI) and Node.js (Express) with SQL Server, enabling hierarchical menus (main, sub, sub-sub) with real-time updates.
- Developed an ERP-style Item Master module with a structured multi-field form, integrated frontend routing and state management to load pages dynamically based on menu selection.

2) IOT Based Accident detection and Alert System

OOPS | 7 D

- An innovative system designed to detect accidents automatically and alert emergency instantly. This technology aims to save lives by speeding up emergency response times.

CERTIFICATIONS

- 1. Generative AI for Beginners
- 2. Experiential Learning
- 3. NASSCOM Data Visualization
